ABOUT

Who We Are

Flintlock is a Casablanca-based digital studio founded by two engineers — **Abdellah ERRAOUI** (CTO) and **Faris BAHBAH** (COO).

We combine high-performance web development, AI integration, automation, and cybersecurity into a single partner.

One point of contact. Clear deliverables. Security by default. Code you own.

METHOD

Our Process

We start from your real processes — not a trendy tool. Every project follows a clear framework, from discovery to support.

01

Discovery & Audit

Map your processes, identify high-volume tasks, prioritize by ROI. Deliverable: Project brief + technical spec.

02

Design & Build

Custom automations, integrations and interfaces — tested and documented. Deliverable: Production-ready codebase.

03

Deploy & Support

Go-live, team training, and ongoing gain tracking. The code belongs to you.

Our commitment

"We don't sell technology. We sell time saved and growth. Every automation must pay for itself."

Process Automation

Eliminate repetitive tasks. Custom pipelines that run your operations on autopilot — 24/7.

n8n

Self-hostable, AI-native workflow automation. Full data sovereignty.

Zapier

Quick adoption, non-technical. 9,000+ integrations.

Content Strategy

Keyword research, content optimization, blog strategy.

Core Web Vitals 2026

$LCP \leq 2.5s$ · $INP \leq 200ms$ · $CLS \leq 0.1$

Impact

3-15% organic traffic recovery in 90-120 days.

Our approach:

1. Audit

Full technical audit with Screaming Frog, PageSpeed Insights, Search Console.

2. Optimize

Fix CWV issues, implement structured data, optimize content.

3. Content

Bilingual keyword strategy (FR/AR). Blog & landing page optimization.

4. Track

Plausible Analytics (privacy-friendly). Monthly reporting.

GEO — AI Search Visibility

Be cited by ChatGPT, Gemini and Perplexity when your clients ask them. GEO is the new SEO.

Entity Clarity

48%

AI Overviews appear on 48% of tracked queries

+40%

GEO techniques increase visibility in generative engines

SEO vs GEO:

SEO

Rank in top positions on Google. Metrics: rankings, clicks, traffic. Key: title tags, keywords, speed.

GEO

Be cited/mentioned in AI answers. Metrics: citations, mentions, share of voice. Key: structured data, entity clarity.

Both are essential

SEO makes you visible on Google. GEO makes you visible in AI responses. We cover both.

Cybersecurity

Audits, protection, backups and compliance — security built in from the first line of code.

OWASP Top 10

Full audit + remediation. Broken Access Control, Injection, Crypto Failures...

Penetration Testing

Black-box & grey-box. OWASP WSTG methodology. MITRE ATT&CK mapping.

OT/ICS Security

OPC UA monitoring, Suricata IDS, Elastic SIEM. IEC 62443 compliant.

Infrastructure

Cloudflare hardening, CSP headers, HSTS, zero-trust architecture.

Morocco context:

20.7M attacks in 6 months

Cyberattack attempts on Moroccan infrastructure (2025 public data).

72h breach notification

CNDP rules mandate disclosure within 72 hours.

8.13% CAGR

IT security spending growth — fastest in Morocco's ICT market.
